

Climate Dynamics

Observational, Theoretical and Computational Research on the Climate System

Instructions to authors

Legal requirements

The author(s) guarantee(s) that the manuscript will not be published elsewhere in any language without the consent of the copyright holders, that the rights of third parties will not be violated, and that the publisher will not be held legally responsible should there be any claims for compensation.

Authors wishing to include figures or text passages that have already been published elsewhere are required to obtain permission from the copyright holder(s) and to include evidence that such permission has been granted when submitting their papers. Any material received without such evidence will be assumed to originate from the authors.

Manuscripts must be accompanied by the "Copyright Transfer Statement". The form is regularly published in this journal or can be obtained from <http://link.springer.de/link/service/journals/382/index.htm>

Editorial procedure

Manuscripts should be submitted in English. In addition to electronic submission, three copies of the manuscript together with illustrations should be sent to an appropriate member of the editorial board (for addresses see second cover page). Please be sure to include your e-mail address and your fax number. Please do not transmit electronic data to the publisher until your manuscript has been reviewed and accepted for publication. Please follow the instructions below.

Manuscript preparation

General remarks

To help you prepare your manuscript, Springer offers a template that can be used with Winword 7 (Windows 95), Winword 6, and Word for Macintosh. For details see **Electronic submission of final version**. All manuscripts are subject to copy editing.

Title page

- A concise and informative title
- The name(s) of the author(s).
- The affiliation(s) and address(es) of the author(s)
- The e-mail address, telephone and fax numbers of the correspondence author

Abstract

Each paper must be preceded by an abstract presenting the most important results and conclusions in no more than 250 words.

Footnotes to the text should be avoided if possible. Where necessary, they should be numbered consecutively and placed at the bottom of the page to which they refer.

SI units should be used exclusively both in the manuscript (including tables) and in the illustrations.

Materials and methods

The materials and methods section should follow the Introduction and should provide enough information to permit repetition of the experimental work.

Results

The results section should describe the outcome of the study. Data should be presented as concisely as possible, if appropriate in the form of tables or figures, although very large tables should be avoided.

Discussion

The discussion should be an interpretation of the results and their significance with reference to work by other authors.

Acknowledgements

These should be as brief as possible. Any grant that requires acknowledgement should be mentioned. The names of funding organizations should be written in full.

Appendices

If there is more than one appendix, they should be numbered consecutively. Equations in appendices should be designated differently from those in the main body of the paper, e.g. (A1), (A2) etc. In each appendix equations should be numbered separately.

References

The list of references should only include works that are cited in the text and that have been published or accepted for publication. Personal communications should only be mentioned in the text. In the text, references should be cited by author and year (e.g. Hammer 1990a; Hammer 1990b; Hammer 1994; Hammer and Sjöqvist 1995; Hammer et al. 1993) and listed in alphabetical order in the reference list.

If available the Digital Object Identifier (DOI) of the cited literature should be added at the end of the reference in

question. Example: Dyllal KG (1998) Relative and non-relative finite nucleus optimized double zeta basis sets for the elements. *Theor Chem Acc* 99: 366–371 DOI 10.1007/s002149800025 Examples:

Journal articles:

Kraft T, Hansen M, Nilsson N-O (2000) Linkage disequilibrium and fingerprinting in sugar beet. *Theor Appl Genet* 101:323–326
Dyllal KG (in press) Relative and nonrelative finite nucleus optimized double zeta basis sets for the elements. *Theor Chem Acc* DOI 10.1007/s002149800025
Journals should be abbreviated in accordance with *Bibliographic Guide for Editors and Authors (BGEA)*.

Books:

Larcher W (1995) *Physiological plant ecology*, 3rd edn. Springer, Berlin Heidelberg New York, pp 87–109

Multiauthor books:

Hovind HJ (1986) Traumatic birth injuries. In: Raimondi AJ, Choux M, Di Rocco C (eds) *Head injuries in the newborn and infant. (Principles of pediatric neurosurgery)* Springer, Berlin Heidelberg New York, pp 87–109

References such as "personal communications" or "unpublished data" cannot be included in the reference list, but should be mentioned in the text in parentheses; this also applies to papers presented at meetings but not yet published or accepted for publication. A date should be given for both "personal communications" and "unpublished data".

Papers which have been accepted for publication should be included in the list of references with the name of the journal and "in press". Oral communications should only be mentioned in the acknowledgements.

Illustrations and Tables

All figures (photographs, graphs, or diagrams) and tables should be cited in the text, and each numbered consecutively throughout. Figure parts should be identified by lower-case roman letters. The placement of figures and tables should be indicated in the left margin. For submission of figures in electronic form see below.

Line drawings

Please submit good-quality prints. The inscriptions should be clearly legible.

Half-tone illustrations (black and white and color). Please submit well-contrasted photographic prints with the top indicated on the back. Magnification should be indicated by scale bars.

Plates

Several figures or figure parts should be grouped in a plate on one page.

Size of figures

The figures should either match the width of the column (86 mm) or 178 mm type area width. The maximum length is 241 mm.

Figure legends must be brief, self-sufficient explanations of the illustrations. The legends should be placed at the end of the text.

Tables should have a title and a legend explaining any abbreviation used in that table. Footnotes to tables should be indicated by superscript lower-case letters (or asterisks for significance values and other statistical data).

For color illustrations the authors will be expected to make a contribution (€ 485 or 435 US \$, plus 16% VAT) towards the extra costs, irrespective of the number of color figures.

Electronic submission of final version

Please send only the final version of the article, as accepted by the editors.

Preparing your manuscript

Text

The template is available:

- * via ftp:
Address: <ftp.springer.de/>
User ID: ftp
Password: your own e-mail address
 - Directory: /pub/Word/journals
 - File names: either sv-journ.zip or sv-journ.doc and sv-journ.dot
- * via www:
 - <http://www.springer.de/author/index.html>

The zip file should be sent unencoded.

Layout guidelines

1. Use a normal, plain font (e.g., Times Roman) for text. Other style options:
 - for textual emphasis use italic types.
 - for special purposes, such as for mathematical vectors, use boldface type.

2. Use the automatic page numbering function to number the pages.
3. Do not use field functions.
4. For indents use tab stops or other commands, not the space bar.
5. Use the table functions of your word processing program, not spreadsheets, to make tables.
6. Use the equation editor of your word processing program or MathType for equations.
7. Place any figure legends or tables at the end of the manuscript.
8. Submit all figures as separate files and do not integrate them within the text.

Data formats

Save your file in two different formats:

1. RTF (Rich Text Format) or Word compatible Word 95/97
2. pdf (a single pdf file including text, tables and figures)

Illustrations

The preferred figure formats are EPS for vector graphics exported from a drawing program and TIFF for halftone illustrations. EPS files must always contain a preview in TIFF of the figure. The file name (one file for each figure) should include the figure number. Figure legends should be included in the text and not in the figure file.

- Scan resolution: Scanned line drawings should be digitized with a minimum resolution of 800 dpi relative to the final figure size. For digital halftones, 300 dpi is usually sufficient.
- Color illustrations: Store color illustrations as RGB (8 bits per channel) in TIFF format.
- Vector graphics: Fonts used in the vector graphics must be included. Please do not draw with hairlines. The minimum line width is 0.2 mm (i.e., 0.567 pt) relative to the final size.

General information on data delivery

Please send a zip file (text and illustrations in separate files) to editors on any of the following media:

- On a diskette [you may use .tar, .zip, .gzip (.gz), .sit, and compress (.Z)]
- On a ZIP cartridge
- On a CD-ROM

Please always supply the following information with your data:

journal title, operating system, word processing program, drawing program, image processing program, compression program. The file name should be memorable (e.g., author name), have no more than 8 characters, and include no accents or special symbols. Use only the extensions that the program assigns automatically.

Electronic supplementary material

Electronic supplementary material (ESM) for an article printed in this journal will be published free of charge to subscribers on Springer's server <http://link.springer.de>. After acceptance by the journal's Editors the data will be supplied as received from the author.

In the printed article, full reference will be given to the ESM and vice versa.

ESM may consist of:

- Original data that relate to the paper, e.g. tables, additional illustrations (color and black/white), etc.
- Information that is more convenient in electronic form.
- Information that cannot be printed: animations, video clips, sound recordings.

For details of acceptable formats, consult <http://link.springer.de/link/service/journals/z382/instr.htm>

Proofreading

Authors should make their proof corrections on a printout of the pdf file supplied, checking that the text is complete and that all figures and tables are included. After online publication, further changes can only be made in the form of an Erratum, which will be hyperlinked to the article. The author is entitled to formal corrections only. Substantial changes in content e.g. new results, corrected values, title and authorship are not allowed without the approval of the responsible editor. In such a case please contact the Editorial Office or the Editor-in-Chief before returning the proofs to the publisher.

Offprints

50 offprints of each contribution are supplied free of charge. Additional offprints are available at cost price provided the order form is returned together with the corrected page proofs. When you order offprints, you are entitled to receive in addition a pdf file of your article for your own personal use.
