

# Critical Reviews in Microbiology

## Instructions to Authors

Authors should submit two copies of reviews, typed double-spaced, with pages numbered and a running head on each sheet. On a separate cover page, authors should give their names, affiliations, address, and phone along with the title of the article being reviewed, its authors, and their affiliations. It is the author's responsibility to obtain permission for use of copyrighted figures, tables, or text from previous publications. There should be an abstract of 200-500 words. Three weights of headings can be used. The first section following the abstract should be an Introduction. The final section is References. Within the text, the references are cited by a number, set as superscript. The references are numbered by the order of appearance, not alphabetically. The list of references in the References section thus appears numerically by order of citation in the text. The style of citation is shown in the following examples:

Journal Article: **Miller, J. A. and Miller, E. C.**, The metabolic activation of carcinogenic aromatic amines and amides, *Prog. Exp. Tumor Res.*, 11, 273, 1969.

Book: **Barrett, J. T.**, Textbook of Immunology, 3<sup>rd</sup> ed., C. V. Mosby, St. Louis. 1978, 261.

Chapter in an editor book: **Walzer, P. D., Kim, C. K., and Cushn, M. T.**, *Pneumocystis carinii*, in *Parasitic Infections in the Compromised Host*, Walzer, P. D. and Genta, R. M., Eds., Marcel Dekker, New York, 1989, 83.

Citation in referenced work: **Snell, J. J. S.**, The distribution and identification of nonfermenting bacteria, cited in: Alexander, M., Ed., *Advances in Microbial Ecology*, Vol. 2. Plenum Press. New York, 1978, 272.

### ARTICLES SHOULD BE SUBMITTED TO:

**Dr. Ronald M. Atlas, Editor**
