

## Instructions to authors

*Ichthyological Research* publishes three types of papers: reviews, full papers, and short reports. Range extensions, teratological notes, and listings of species inhabiting geographic areas will not be published unless they contribute significantly to the understanding of biological processes. Contribution to the journal is open only to members of the society; multi-authored papers that include at least one society member may be submitted.

Papers must present scientific results that are essentially new and that have not been published or submitted for publication elsewhere. Send one original and two high-quality copies of the manuscript to the Editor-in-Chief:

Hiroshi Kohno  
Laboratory of Ichthyology  
Tokyo University of Fisheries  
4-5-7 Konan, Minato-ku, Tokyo 108-8477, Japan  
Tel.: +81-3-5463-0529; Fax: +81-3-5463-0527  
e-mail: hirokun@tokyo-u-fish.ac.jp

Manuscripts may also be submitted as electronic data, in which case the text, tables, and figures must be combined in a single PDF file and sent as an e-mail attachment to the Editor-in-Chief. The file name must include the corresponding author's name. If assistance is required in creating the PDF file, contact Seishi Kimura, Managing Editor, by e-mail: kimura-s@bio.mie-u.ac.jp.

Manuscripts must be written in English and typed in double-line spacing with 3-cm margins; pages (and lines in a PDF file) should be numbered consecutively through the entire text.

Short reports must not exceed four printed pages, including references, illustrations, and tables. (An average printed page contains approximately 6200 characters including spaces, or about 1000 words.)

**Copyright transfer.** Authors transfer the copyright to their article to the Ichthyological Society of Japan effective if and when the article is accepted for publication. The copyright covers the exclusive and unlimited rights to reproduce and distribute the article in any form of reproduction (printing, electronic media, or any other form); it also covers translation rights for all languages and countries. For U.S. authors the copyright is transferred to the extent transferable.

**Manuscripts in electronic form.** After acceptance, please send the final version of your manuscript to the Managing Editor. Please follow the Technical Instructions for Manuscripts and Illustrations in Electronic Form, published in most issues. Please note that the preferred requirement for the final data format is rtf; PDF files are not acceptable for final data.

**Authors of a new taxon.** A new scientific name for a taxon proposed by one, two, or three authors will be accepted. New names proposed by more than three authors are not acceptable.

**Manuscripts.** Please organize your manuscript as follows:

- *Title page*, including title of paper; all authors' full names, institutions, and addresses at which the research was conducted (plus current affiliation(s), if applicable); address to which proofs should be sent, including e-mail address and phone and fax number; suggested running head within six words; type of paper; number of text pages, number of figures, and number of tables. Authorship of scientific names should be included in the title only when nomenclatural problems are involved.
- *Abstract* (no more than 100 words for short reports and 350 words for other papers) and 3–5 *key words*.
- The text of the paper should be divided into the following sections, if appropriate: *Introduction; Materials and Methods; Results; Discussion; Acknowledgments; Literature Cited; Tables; Figure Legends*. Please include, at the end of the acknowledgments, a declaration that any experiments comply with the current laws of the country in which they were performed. The Editor-in-Chief reserves the right to reject manuscripts that do not comply with the above-mentioned requirements. The author will be held responsible for false statements or for failure to fulfill the above-mentioned requirements.

**Footnotes** should be avoided whenever possible.

**Generic and specific names** should be italicized or underlined once. Standard Japanese names of organisms, and the English common names should begin with a lowercase letter.

**Common abbreviations and symbols** such as  $\mu\text{m}$ , mm, cm, g, °C (for Celsius), and % should be used. Measurements should be given in metric units.

**Literature citations in the text** should indicate the author's surname with the year of publication in parentheses, e.g., Carlin (1992); Brooks and Carlin (1992).

**Literature cited at the end of the paper** should be listed in alphabetical order by the first author's name:

Journal papers:

names and initials of all authors; year; full title; journal title abbreviated in accordance with international practice; volume number; first and last page numbers:  
Kokita T, Nakazono A (1999) Pair territoriality in the longnose filefish, *Oxymonacanthus longirostris*. *Ichthyol Res* 46:297–302

Single contributions in a book:

names and initials of all authors; year; title of article; editor(s); title of book; edition; volume number; publisher; place of publication; page numbers:  
Kumazawa Y, Yamaguchi M, Nishida M (2000) Mitochondrial molecular clocks and the origin of euteleostean biodiversity. In: Kato M (ed) *The biology of biodiversity*. Springer, Tokyo, pp 35–52

Books:

names and initials of all authors; year; title; publisher; place of publication:

Marshall NB (1979) *Developments in deep-sea biology*. Blandford, Poole

**Tables** must be numbered consecutively with arabic numerals; each table should be typed on a separate page together with a clear descriptive title.

**Illustrations** should be kept to the minimum needed to clarify the text. They should be submitted on separate sheets, each bearing the figure number, the author's name, and an arrow indicating proper orientation. Do not submit original figures until the review process has been completed. Most figures are reduced to one-column width (ca. 7–8 cm); therefore, lettering should be sized appropriately. If a two-column width (ca. 13–17 cm) is required for a figure, the preferred size (e.g., "Two-column width," "15-cm width") should be indicated on the corner of the reverse side of the figure. Legends should be typed together on a sheet separate from the figures. Each legend must be descriptive so that the figure can be understood apart from the text and must define abbreviations used in the figure.

**Color illustrations** will be accepted; however, authors will be expected to make a contribution toward the additional costs (approx. 110 000 yen for the first and 60 000 for each additional page). Photographs should be well contrasted.

**Halftone illustrations** should be well-contrasted glossy prints.

**Line-drawings** should be of good quality. The inscriptions must be clearly legible. Uppercase letters should be about 2 mm high in the final version.

**Illustrations prepared in digital form** must be in accordance with the Technical Instructions for Manuscripts and Illustrations in Electronic Form.

**Electronic supplementary material.** Data, such as black-and-white or color illustrations, large tables, animations, video clips, or sound recordings that are not essential for the understanding of a printed article but are of interest, can be put on Springer's server and will be accessible free of charge on the contents site of this journal. Such material must be submitted in electronic form (see the special instructions [<http://link.springer.de/cgi/esupp.pl?10228>]) and will be reviewed. Reference to this material will be given with the printed article.

**Proofs** must be corrected upon receipt and returned immediately to the publisher. Extensive corrections to the content at proof stage are not allowed. Offprints may be ordered when the page proofs are returned. Original manuscripts will not normally be returned. Original artwork will be returned only at an author's request.

**Excess-length charges.** Note that papers that exceed six printed pages (full papers) or two printed pages (short reports) in length are subject to page charges (currently 6000 yen for each page in excess of the limit).
