

Entomologia Generalis (ISSN: 0171-8177)

Journal of General and Applied Entomology

Entomologia Generalis is an international Journal for General and Applied Entomology, concerned with experimental, comparative and descriptive problems in all fields of research in insects and other terrestrial arthropods. It aims to continually supply new information about recent results and promising theories in this science, relating simultaneously to various of its branches, or closely connecting them.

Emphasis is on the publication of original research papers [**Articles** of 6-20 printed pages]. Furthermore, reviews are offered on topical entomological problems, as well as summaries on high standard research results [**Reports** of 6-20 printed pages]. Besides, short communications are published about new records, ideas, observations etc, as well as exchanges of views and methods [**Notes** of 2-5 printed pages]. Finally, preview abstracts are presented of work which is being completed, but not yet ready for publication in a more extensive form [**Synopses** of 1-3 printed pages].

Editor-in-Chief: Prof. Dr. August Wilhelm Steffan, Am Bergborn 1, 63599 Biebergemünd, Germany, Fax 06050 -912910, wilhelm.steffan@t-online.de

Executive Editors:

Applied Entomology: Prof. Dr. Fred Klingauf, Präsident & Professor der Biologischen Bundesanstalt für Land- und Forstwirtschaft, Messeweg 11-12, 38104 Braunschweig; Germany

Chemical Entomology: Prof. Dr. Konrad Dettner, Lehrstuhl für Tierökologie II, Universität Bayreuth, Postfach 101251, 95447 Bayreuth; Germany

Developmental & Behavioural Entomology: Prof. Dr. Wolf Engels, Zoolog. Institut, Eberhard-Karls-Univ., 72076 Tübingen; Germany

Environmental & Evolutionary Entomology: Prof. D. A. Wilhelm Steffan, Am Bergborn 1, 63599 Biebergemünd, Germany, Fax 06050 -912910, wilhelm.steffan@t-online.de

Macro- & Microstructural Entomology: Prof. Dr. Werner Peters, † Lehrstuhl Morphologie & Zellbiologie, Institut für Zoologie II, Heinrich-Heine-Universität, 40225 Düsseldorf; Germany

Manuscript submission and acceptance

Manuscripts intended for publication in **Entomologia Generalis** should - complying with the author's mother tongue - preferably be written in English or German. Foreign-language authors must prove that they have enlisted the aid of a colleague whose mother tongue corresponds to the language used in the respective paper. Contributions may not have been published elsewhere in identical or similar form or content. Range, style and general appearance must be consistent with the standards maintained by this journal. Contributors are asked to prepare their papers according to the detailed "Richtlinien für die Verfasser wissenschaftlicher Beiträge", published in *Entomologica Germanica* 1(2): 195-208, Stuttgart 1975; and the "Instructions for Contributors" which usually appear in issue 4 of every volume of *Entomologia Generalis*. Copies of either Guide as well as new and more detailed regulations for computer processing can be obtained on request from the Editor-in-Chief.

Typescripts and clearly labelled illustrations in triplicate [in addition to files containing: (a) text and tables, (b) graphs] should be submitted - according to the treated subject - to one of the Executive Editors, or - according to the author's residence - to one of the Regional Editors. All items should (as far as possible) be processed by WINDOWS-98 /WORD-2000. Tables must be set print-ready in vertical format; those extending a one page area of type (126x190mm) will not be accepted. All correspondence concerning proofs, revisions etc. should exclusively be directed to the Editor-in-Chief, but not to the Publishing House. Each incoming contribution will be forwarded for review to at least two members of the Advisory Board of this journal or to other specialists who represent the respective field dealt with in the paper. The acceptance of the referees' and editors' suggestions concerning changes, improvements, additions, or omissions is a further pre-condition for approval. Editors and publisher intend to publish the submitted Articles, Reports, and Notes within 6 months after consignment. Submitted material conforming to the given standards and requiring little editing and no further revision has a better chance of appearing quickly. Synopses can be published more speedily; they will usually be considered for the issue just in preparation at the time of receipt with the Editor-in-Chief.

Fifty reprints of each publication of every item will be supplied free of charge. Additional reprints can be ordered on a reprint order form which is enclosed to the proofs. There is no page charge for contribution of the above mentioned extensions. Colour prints can be accepted if necessary, but will be charged according to size.

Publication Schedule and Subscription Information

Entomologia Generalis consists of one volume per year, consisting of four individual issues, with a total of 320 pages per volume. The subscription price for volume 27 is € 234,00 plus postage, payable with the appearance of the first issue of each volume.

You can subscribe to **Entomologia Generalis** through any bookstore or directly through the publisher (see below)
