St. Louis, MO 63146-3318

INFORMATION FOR AUTHORS

General Policy

The *Journal of Nuclear Cardiology* publishes articles on original research, clinical observations, and reviews of nuclear cardiology subjects and related fields.

Articles are accepted for publication with the stipulation that they are submitted solely to the *Journal of Nuclear Cardiology*, and they are subject to editorial revision. The Journal will not consider for publication papers that have been published in other journals, even if in another language; papers that are being considered by another journal; or papers that are in press. If a paper by the same author(s) contains any data previously published, in press, or under consideration by another journal, a reprint of that article or a copy of that manuscript should be submitted to the Editor in Chief, with an explanation by the author(s) of the overlap or duplication. Permission to reproduce material from the Journal must be obtained from the publisher. Authors will be consulted when possible regarding publication of their material.

All manuscripts must be accompanied by the following written statement, signed by all authors: "The undersigned authors transfer all copyright ownership of the manuscript entitled [title of article] to the American Society of Nuclear Cardiology in the event the work is published. The undersigned authors warrant that the article is original, does not infringe upon any copyright or other proprietary right of any third party, is not under consideration by another journal, and has not been previously published. The final manuscript has been read, and each author's contribution has been approved by the appropriate author. We attest that we have not and will not distribute copies or reprints of this article for commercial use prior to its publication in the Journal. We further attest that we herein disclosed any and all financial or other relationships which could be construed as a conflict of interest and that all sources of financial support for this study have been disclosed and are indicated in the acknowledgment."

It is prohibited to distribute copies or preprints of accepted articles for commercial use prior to their publication in the Journal. If this policy is violated, the paper will not be published.

Statements and opinions expressed in the articles and communications therein are those of the author(s) and not necessarily those of the Editor in Chief, publisher, or American Society of Nuclear Cardiology; the Editor, publisher, and Society disclaim any responsibility or liability for such material. Neither the Editor in Chief, the publisher, nor the Society guarantees, warrants, or endorses any product or service advertised in this publication; neither do they guarantee any claim made by the manufacturer of such product or service.

Papers describing research involving human subjects should indicate that informed consent was obtained.

Authorship

Each author must have contributed significantly to the submitted work. If there are more than 4 authors, the contribution of each must be substantiated in the cover letter. The Editors consider authorship to include all the following: (1) conception and design or analysis and interpretation of data or both; (2) drafting of the manuscript or revising it critically for important intellectual content; (3) final approval of the manuscript submitted. Participation solely in the collection of data does not justify authorship but may be appropriately acknowledged in the Acknowledgment section of the manuscript.

Cover Letter

Manuscripts must be submitted with a cover letter stating that the paper is not under consideration for publication elsewhere, that none of the paper's contents have been previously published, that all authors have read and approved the manuscript, and the full disclosure of any potential conflict of interest (see Conflict of Interest Policy).

Exceptions must be explained. The corresponding author should be specified in the cover letter. All editorial communications will be sent to this author.

Return of Manuscripts

Manuscripts not accepted for publication will not be returned to the authors.

Conflict of Interest

The Journal requires all authors to acknowledge, on the title page of their manuscript, all funding sources that supported their work, as well as all institutional or corporate affiliations of the authors. Authors are also required to disclose to the Editor in Chief, in a covering letter at the time of submission of their manuscript, any commercial associations that might pose a conflict of interest. These include consultant arrangements, stock or other equity ownership, patent licensing arrangements, or payments for conducting or publicizing the study. The disclosure will be held in strict confidence during the review process and will not influence any editorial decisions. All declared conflicts of interest will be published with accepted manuscripts. If there are no declared conflicts of interest, this will also be stated at the conclusion of the article.

Preparation of Manuscripts

All manuscripts and editorial correspondence should be submitted by first-class (not registered) or overnight mail to Dr. Barry L. Zaret, Editor in Chief, at the address given above. Submission of manuscripts in the correct format will expedite the review process and prevent unnecessary delay in publication.

Format. Submit three copies (letter-quality computer printout or clean, sharp photocopy accepted), typewritten on one side of white 8½ × 11 inch (22 × 28 cm) paper, sequentially numbered, double-spaced (including references, figure legends, and tables) with liberal margins, and approximately 25 lines to a page.

Once a manuscript is **accepted**, the final version of the manuscript may be submitted on diskette along with three copies of the printout. The author accepts responsibility for the submitted diskette exactly matching the printout of the final version of the manuscript. Guidelines for submission of accepted manuscript on diskette will be sent to the author by the editorial office.

Title Page. The title page should include authors' names and academic degrees; departmental and institutional affiliations of each author; and sources of financial assistance, if any. Listed authors should include only those individuals who have made a significant, creative contribution. Designate one author as the correspondent, and provide address, business and home telephone numbers, fax number, and e-mail address, if available. Galley proofs will be sent to the corresponding author, as will an order form for reprints at a later date.

Abstract. Full-length papers for the Original Articles section or special sections of the Journal should include a summation of 200 words or less, to appear after the title page. Abstracts for papers to appear in the Original Articles section must be written in structured

form with paragraphs labeled Background, Methods and Results, and Conclusions. Authors are encouraged to use the general outline described by the Ad Hoc Working Group for Critical Appraisal of the Medical Literature (Ann Intern Med 1987;106:598-604).

Laboratory Values. Laboratory values should be described in both the International System of Units (SI units) and in metric mass units. The SI units should be stated first and the metric units in parentheses immediately thereafter. Conversion tables are available (see JAMA 1986;225:2329-39 or Ann Intern Med 1987;106:114-29).

References. Number references according to order of appearance in the text, following the format set forth in "Uniform Requirements for Manuscripts Submitted to Biomedical Journals" (Ann Intern Med 1997;126:36-47), with journal abbreviations according to *Cumulated Index Medicus*. If the reference is to an abstract, letter, or editorial, place the appropriate term in brackets after the title.

EXAMPLES OF REFERENCES (if more than six authors, list first six and add "et al"):

For journal articles:

Oleske J, Minnefor A, Cooper R Jr, Smith PB, Oswald BR, Atkinson J, et al. Immune deficiency syndrome in children. JAMA 1983;249:2345-9.

For books:

Bradley EL. Medical and surgical management. Philadelphia: WB Saunders; 1982. p. 72-95.

For chapters in books:

Bohl I, Wallenfang T, Bothe H, Smith PB, Oswald BR, Atkinson J, et al. The effect of glucocorticoids in the combined treatment of experimental brain abscess in cats. In: Scheifer W, Klingner M, Brock M, editors. Brain abscess and meningitis: subarachnoid hemorrhage—timing problems. Berlin: Springer Verlag; 1981. p. 125-33.

Tables. Each table should be double-spaced on a separate sheet of paper. A concise title should be supplied for each. Tables should be self-explanatory and should supplement, not duplicate, the text. If a table or any data therein have been previously published, a footnote must give full credit to the original source. Abbreviations used in a table must be spelled out in a footnote to that table.

Figure Legends. Each illustration must be provided with a legend. Type legends double-spaced on a separate sheet of paper. If an illustration has been previously published, the legend must give full credit to the original source. If letters, numbers, or symbols are used to identify portions of a figure, these must be explained clearly in the legend to that figure.

Illustrations. Original drawings or graphs should be prepared in black India ink or typographic (press-apply) lettering. Typewritten or freehand lettering is unacceptable. All lettering must be done professionally and should be in proportion to the drawing, graph, or photograph. Do not send original artwork, x-ray films, or ECG strips. Color illustrations can be accommodated at a cost to the author for color separation and printing. Final decisions concerning inclusion of color figures will be made by the Editor in conjunction with the authors.

Computer-generated black-and-white illustrations must be legible and clearly printed in jet-black ink on heavy coated paper with either a glossy or dull finish. Any patterns or shadings must be dark enough for reproduction and must be distinguishable from each other. Lines, symbols, and letters should be both smooth and complete. Legends for illustrations should not appear on the prints. Original individual laser or plotter prints are to be submitted unmounted. Laser prints should be full size at 300 dots per inch or greater full-page resolution; multiple illustrations on a page cannot be accepted. Dot matrix prints and photographic halftones are not acceptable.

Computer-generated color illustrations are acceptable, but special arrangements must be made with the Editor. The colors used must be dark enough and of sufficient contrast for reproduction. With the exception of fluorescent colors, all colors can be reproduced in four-color illustrations. Preparation and submission of color prints should follow the preceding guidelines for black-and-white computer-generated illustrations.

Glossy print photographs, 3 × 4 inches (minimum) to 5 × 7 inches (maximum), with good black-and-white contrast or color balance, are preferred. Because of the visual nature of the specialty, the authors are expected to supply prints of the highest quality. Consistency in size within the article is strongly preferred. Special instructions regarding sizing should be clearly noted. Illustrations will not be returned.

Submit three sets of glossy prints, unmounted, numbered, and marked lightly on the back with author name and with top designated. Color illustrations are acceptable but must be of high quality.

Electronic Illustration Submission. Figures may be submitted in electronic format. All images should be at least 5 inches wide. Images should be provided in EPS or TIF format on Zip disk, CD, floppy, Jaz, or 3.5 MO. Macintosh or PC is acceptable. Graphics software such as Photoshop and Illustrator, not presentation software such as PowerPoint, CorelDraw, or Harvard Graphics, should be used in the creation of the art. Color images need to be CMYK, at least 300 DPI, and be accompanied by a digital color proof, not a color laser print or color photocopy. Note: This proof will be used at press for color reproduction. Gray scale images should be at least 300 DPI with a proof. Combinations of gray scale and line art should be at least 1200 DPI with a proof. Line art (black and white or color) should be at least 1200 DPI accompanied by a proof. Please include hardware and software information, in addition to the file names, with the disk.

Permissions. Direct quotations, tables, or illustrations that have appeared in copyrighted material must be accompanied by written permission for their use from the copyright owner and original author along with complete information as to source.

Permission from the patient, or parent or guardian of a minor child, is required for publication of recognizable likenesses. Patient initials should not be used.

Articles appear in both the print and online versions of the journal, and wording of the letter should specify permission *in all forms and media*. Failure to get electronic permission rights may result in the images not appearing in the online version.

Abbreviations. Complex terms used frequently in the manuscript may be abbreviated. Abbreviated terms should be spelled out at first mention, followed by the abbreviation in parentheses.

Editorial Correspondence

Letters pertaining to articles published in the Journal or to related topics should include no more than 300 words and three references and should be prepared in the same style as other manuscripts.

News Items

Announcements of scheduled meetings, symposia, or postgraduate courses of national interest may be sent for consideration to the Editor at least 5 months in advance of the meeting date. News items of general interest to nuclear cardiologists will also be considered.

Books for Review

Books and monographs, domestic and foreign, will be reviewed on the basis of their interest and value to subscribers. Books should be sent to Albert J. Sinusas, MD, Yale University School of Medicine, *Journal of Nuclear Cardiology*, 135 College St., Suite 301, New Haven, CT 06510. Books will not be returned. Books received will be listed in the Book Reviews section, but only selected ones will be reviewed.

Reprints

Authors may order reprints of their articles directly from the publisher, who will send a schedule of prices. Single reprints may be obtained from the author.

Checklist

- Letter of submission
- Copyright transfer signed by all authors
- Three copies of article
- Title page
 - Title of article
 - Name(s), academic degrees, and affiliations of author(s)
 - Name, address, business and home telephone numbers, and fax number of corresponding author (who will also receive reprint requests)
- Abstract (double-spaced)
- List of abbreviations (double-spaced)
- Article proper (double-spaced)
- Acknowledgments (double-spaced)
- References (double-spaced), on a separate sheet
- Tables (double-spaced), on separate sheets
- Legends (double-spaced), on a separate sheet
- Illustrations, properly labeled (three sets of glossy prints)
- Permission to reproduce previously published material *in all forms and media*
- Informed consent for patient photographs
